

This submission is **NOT FINAL**

RESPONSIBILITIES

Use Cases:	Jason and Stanley
Design Documentation:	
- Class diagram:	Methirah
- Normal sequence diagram:	Daniel
- Safety sequence diagram:	Daniel
- State machine diagram(s):	Methirah and Stanley
- Textual explanation of design:	Jason
Implementation (split by steps):	
Step 1:	Jason
Step 2:	Stanley
Step 3:	Methirah
Step 4:	Daniel
Step 5:	Jason
Step 6:	Stanley
Step 7:	Methirah
Video:	Daniel
Requirements traceability matrix:	Jason

SCHEDULE

Finish use cases and design documentation by April 15th.

Finish implementation by April 21nd.

Finish doing testing and final adjustments, the video and requirements traceability matrix on the 22nd.

REASON

It's very difficult to meaningfully start the code and design documents without the rubric. Furthermore, at the time of writing the sequence diagrams have still not been finalized. This severely impacted the organization and schedule we had planned previously.
